Re: Lead paint removal project  
Mercury release (MSD)  
Presentation Project X  
Project Agreements (PA) Comment

Dear Ms. Breen and Ms. Greene,

The Environmental Protection Agency and the Office of  
the Project Manager and the Office of the Director of the  
Project Office propose to develop a memorandum of understanding  
between the project manager and the Atlanta area EPA regarding  
the use of lead paint removal equipment by EPA. MSD has so far conducted a FPP  
that

? e.g. guidelines for use of lead paint removal equipment  
? provide specific information on materials to be used  
? describe the methods of disposal of lead paint debris  
? establish criteria for the use of lead paint removal equipment  
? avoid damage to buildings during lead paint removal  
and other relevant information.

The Environmental Protection Agency and the Office of the Project Manager and the Office of the Director of the Project Office propose to develop a memorandum of understanding  
between the project manager and the Atlanta area EPA regarding  
the use of lead paint removal equipment by EPA. FPP has so far conducted a FPP  
that

We strongly oppose EPA's proposed use of lead paint removal equipment  
in the Atlanta area.

1. Approval of Project X FAP will be obtained from the Office of  
the Project Manager and the Office of the Director of the Project Office. The  
Office of the Project Manager and the Office of the Director of the Project Office  
will review the proposed use of lead paint removal equipment by EPA. If the  
use of lead paint removal equipment by EPA is approved, the Office of the Project Manager and the Office of the Director of the Project Office  
will issue a memorandum of understanding between the project manager and the Atlanta area EPA.
